

# CURRICULUM DESIGN for Geography

## Geography INTENT

At Mosaic Jewish Primary School, we aim to inspire pupils to become curious and explorative thinkers with a diverse knowledge of the world; in other words, to think like a geographer. We want pupils to develop the confidence to question and observe places, measure and record necessary data in various ways, and analyse and present their findings. Our curriculum has been designed to build an awareness of how Geography shapes our lives at multiple scales, is interconnected and changes over time. We hope to encourage pupils to become resourceful, active citizens who will have the skills to contribute to and improve the world around them. By enabling them to form their own opinions on key geographical issues, including those local to them such as air pollution, and in a wider context climate change they will develop a deeper understanding of the world they live in. The four key geographical themes: are locational knowledge; place knowledge; human and physical geography; and geographical skills and fieldwork. These themes have been mapped out across the school, ensuring that knowledge builds progressively and that children develop skills systematically.

Our curriculum encourages:

- A strong focus on developing both geographical skills and knowledge.
- Critical thinking, with the ability to ask perceptive questions, collect and analyse a range of data and explain findings.
- The development of fieldwork skills across each year group; how to use sources of geographical information, including maps, diagrams, aerial photographs and Geographical Information Systems (GIS)
- A deep interest and knowledge of pupils' locality and how it differs from other areas of the world.
- A growing understanding of geographical concepts, terms and vocabulary.

## Geography IMPLEMENTATION

At Mosaic we have a spiral curriculum designed to revisit essential skills and knowledge with increasing complexity, allowing pupils to revise and build on their previous learning. Locational knowledge will be reviewed in each unit to coincide with our belief that this will consolidate children's understanding of key concepts, such as scale and place, in Geography.

Our enquiry questions form the basis for our Key stage 1 and 2 units, meaning that pupils gain a solid understanding of geographical knowledge and skills by applying them to answer enquiry questions. We have designed these questions to be open-ended with no preconceived answers and therefore they are genuinely purposeful and engage pupils in generating a real change. In attempting to answer them, children learn how to collect, interpret and represent data using geographical methodologies and make informed decisions by applying their geographical knowledge.

Each unit contains elements of geographical skills and fieldwork to ensure that fieldwork skills are practised as often as possible. Each unit follows an enquiry cycle that maps out the fieldwork process of question, observe, measure, record, and present, to reflect the elements mentioned in the National curriculum. This ensures children will learn how to decide on an area of enquiry, plan to measure data using a range of methods, capture the data and present it to a range of

appropriate stakeholders in various formats. Fieldwork includes smaller opportunities on the school grounds to larger-scale visits to investigate physical and human features. Developing fieldwork skills within the school environment and revisiting them in multiple units enables pupils to consolidate their understanding of various methods. It also gives children the confidence to evaluate methodologies without always having to leave the school grounds. This makes fieldwork regular and accessible while giving children a thorough understanding of their locality, providing a solid foundation when comparing it with other places in the world.

Lessons incorporate various teaching strategies from independent tasks to paired and group work, including practical hands-on, computer-based and collaborative tasks. This variety means that lessons are engaging and appeal to those with a variety of learning styles, and opportunities to stretch pupils' learning are built into the planning. Knowledge organisers for each unit are used to support pupils in building a foundation of factual knowledge by encouraging recall of key facts and vocabulary to deliver a highly effective and robust Geography curriculum.

### Geography IMPACT

An enquiry-based approach to learning allows teachers to assess children against the National Curriculum expectations for Geography. The impact of learning can be constantly monitored through both formative and summative assessment opportunities. Each unit has a unit quiz and knowledge catcher, which is used at the end of the unit to assess children's understanding, together with pupil voice. Opportunities for children to present their findings using their geographical skills also forms part of the assessment process in each unit. When planning, the outcomes to be assessed are clearly identified at the beginning of the unit through key questions. They are linked explicitly with the development of skill at three different levels; working at towards the expected standard; working at the expected standard and working at a greater depth. Through on-going assessment involving practical activities, and discussions pupils can show their understanding in a variety of ways.

### **Geography programmes of study: key stages 1 and 2 National curriculum in England**

#### **Attainment targets**

By the end of each key stage, pupils are expected to know, apply and understand the matters, skills and processes specified in the relevant programme of study.

#### **Key stage 1**

Pupils should develop knowledge about the world, the United Kingdom and their locality. They should understand basic subject-specific vocabulary relating to human and physical geography and begin to use geographical skills, including first-hand observation, to enhance their locational awareness. Pupils should be taught to:

### **Locational knowledge**

- name and locate the world's seven continents and five oceans
- name, locate and identify characteristics of the four countries and capital cities of the United Kingdom and its surrounding seas

### **Place knowledge**

- understand geographical similarities and differences through studying the human and physical geography of a small area of the United Kingdom, and of a small area in a contrasting non-European country

### **Human and physical geography**

- identify seasonal and daily weather patterns in the United Kingdom and the location of hot and cold areas of the world in relation to the Equator and the North and South Poles
- use basic geographical vocabulary to refer to:
- key physical features, including: beach, cliff, coast, forest, hill, mountain, sea, ocean, river, soil, valley, vegetation, season and weather
- key human features, including: city, town, village, factory, farm, house, office, port, harbour and shop **Geographical skills and fieldwork**
- use world maps, atlases and globes to identify the United Kingdom and its countries, as well as the countries, continents and oceans studied at this key stage
- use simple compass directions (North, South, East and West) and locational and directional language [for example, near and far; left and right], to describe the location of features and routes on a map
- use aerial photographs and plan perspectives to recognise landmarks and basic human and physical features; devise a simple map; and use and construct basic symbols in a key
- use simple fieldwork and observational skills to study the geography of their school and its grounds and the key human and physical features of its surrounding environment.

### **Key stage 2**

Pupils should extend their knowledge and understanding beyond the local area to include the United Kingdom and Europe, North and South America. This will include the location and characteristics of a range of the world's most significant human and physical features. They should develop their use of geographical knowledge, understanding and skills to enhance their locational and place knowledge. Pupils should be taught to:

### **Locational knowledge**

- locate the world's countries, using maps to focus on Europe (including the location of Russia) and North and South America, concentrating on their environmental regions, key physical and human characteristics, countries, and major cities
- name and locate counties and cities of the United Kingdom, geographical regions and their identifying human and physical characteristics, key topographical features (including hills, mountains, coasts and rivers), and land-use patterns; and understand how some of these aspects have changed over time
- identify the position and significance of latitude, longitude, Equator, Northern Hemisphere, Southern Hemisphere, the Tropics of Cancer and Capricorn, Arctic and Antarctic Circle, the Prime/Greenwich Meridian and time zones (including day and night)

### **Place knowledge**

- understand geographical similarities and differences through the study of human and physical geography of a region of the United Kingdom, a region in a European country, and a region within North or South America
- human geography, including: types of settlement and land use, economic activity including trade links, and the distribution of natural resources including energy, food, minerals and water

### **Human and physical geography**

describe and understand key aspects of:

- physical geography, including: climate zones, biomes and vegetation belts, rivers, mountains, volcanoes and earthquakes, and the water cycle
- human geography, including: types of settlement and land use, economic activity including trade links, and the distribution of natural resources including energy, food, minerals and water

### **Geographical skills and fieldwork**

- use maps, atlases, globes and digital/computer mapping to locate countries and describe features studied
- use the eight points of a compass, four and six-figure grid references, symbols and key (including the use of Ordnance Survey maps) to build their knowledge of the United Kingdom and the wider world
- use fieldwork to observe, measure, record and present the human and physical features in the local area using a range of methods, including sketch maps, plans and graphs, and digital technologies.

# Whole School Overview

Our Geography curriculum for KS1-KS2 follows four main themes: locational knowledge; place knowledge; human and physical geography; and geographical skills and fieldwork. There is an expectation that children will use their prior learning (color coded below for ease) and build upon this as they journey through Mosaic. Children will reach an end point where their understanding of the world has been strengthened and deepened through this purposefully mapped out curriculum.

In Early Years, children will encounter Geography through enquiry to transition successfully onto Key stage 1 Geography learning, whilst also working towards the Development matters statements and Early Learning Goals. They will leave Early Years with some of the geographical vocabulary and concepts like N, S, E, and W together with basic understanding of where they live and how this differs to other areas. How people live in different parts of the world and be prepared for their Y1 learning on the weather through their daily discussions and observations of weather conditions and seasons. Year 1 builds on this prior learning and extends it through their fieldwork studies. The EYFS curriculum is mindful of how their curriculum can be used to create the foundations of prior knowledge which we build upon as children journey through Year 1 and KS1.

	Locational Knowledge	Place Knowledge	Human and Physical Geography	Geographical Skills and Fieldwork
Year Group	Autumn	Spring	Summer	
Reception	Can places be different sizes and shapes?	What are local areas, continents and oceans?	Why are there different traditions and tales around the world?	
Year 1	What is it like here?	What is the weather like in the UK?	What is it like to live in Shanghai?	
Year 2	Would you prefer to live in a hot or cold place?	Why is our world wonderful?	What is it like to live by the coast?	
Year 3	Why do people live near volcanoes?	Who lives in Antarctica?	Are all settlements the same?	
Year 4	Why are rainforests important?	Where does our food come from?	What are rivers used for?	
Year 5	What is lifelike in the Alps?	Why do Oceans matter?	Would you like to live in the desert?	

Year 6	Why do populations change?	Where does our energy come from?	Can I carry out independent enquiry?
--------	----------------------------	----------------------------------	--------------------------------------

# Progression of Knowledge

Locational Knowledge							
	Reception	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Skills		<p>Locating two of the world's seven continents on a world map.</p> <p>Locating two of the world's oceans (Atlantic Ocean and Pacific Ocean) on a world map.</p> <p>Showing on a map which continent they live in.</p> <p>Locating the four countries of the United Kingdom (UK) on a map of this area.</p> <p>Showing on a map which country they live in and locating its capital city.</p>	<p>Locating all the world's seven continents on a world map. Locating the world's five oceans on a world map. Showing on a map the oceans nearest the continent they live in.</p> <p>Locating the surrounding seas and oceans of the UK on a map of this area.</p> <p>Locating the capital cities of the four countries of the UK on a map of this area.</p> <p>Identifying characteristics (both human and physical) of the four capital cities of the UK.</p> <p>Showing on a map the city, town or village where they live in relation to their capital city.</p>	<p>Locating some countries in Europe and North and South America using maps. Locating some major cities of the countries studied.</p> <p>Locating some key physical features in countries studied on a map including significant environmental regions.</p> <p>Locating some key human features in countries studied.</p> <p>Locating the world's most significant mountain ranges on a world map and identifying any patterns.</p> <p>Locating where the world's volcanoes are on a map and identifying the 'Ring of Fire'.</p> <p>Locating some of the world's most significant rivers and identifying any patterns.</p> <p>Locating some counties in the UK (local to your school). Locating some cities in the UK (local to your school).</p> <p>Identifying key physical and human characteristics of counties,</p>			<p>Locating more countries in Europe and North and South America using maps. Locating major cities of the countries studied. Locating key physical features in countries studied on a map . Locating key human features in countries studied.</p> <p>Identifying significant environmental regions on a map.</p> <p>Using maps to show the distribution of the world's climate zones, biomes and vegetation belts.</p> <p>Locating many counties in the UK. Locating many cities in the UK.</p> <p>Confidently locating the twelve geographical regions of the UK.</p> <p>Identifying key physical and human characteristics of the geographical regions in the UK.</p> <p>Understanding how land-use has changed over time using examples.</p> <p>Explaining why a locality has changed over time, giving</p>

				<p>cities and/or geographical regions in the UK.</p> <p>Beginning to locate the twelve geographical regions of the UK.</p> <p>Identifying how topographical features studied have changed over time using examples.</p> <p>Describing how a locality has changed over time, giving examples of both physical and human features.</p> <p>Finding the position of the Equator and describing how this impacts our environmental regions.</p> <p>Finding lines of latitude and longitude on a globe and explaining why these are important.</p> <p>Identifying the position of the Tropics of Cancer and Capricorn and their significance.</p> <p>Identifying the position of the Northern and Southern hemispheres and explaining how they shape our seasons.</p> <p>Identifying the position and significance of both the Arctic and Antarctic Circle.</p>	<p>examples of both physical and human features.</p> <p>Identifying the location of the Prime/Greenwich Meridian and time zones (including day and night) and explaining its significance.</p> <p>Using longitude and latitude when referencing location in an atlas or on a globe.</p>
<b>Knowledge</b>		<p>To know the name of the two continents (Europe and Asia).</p> <p>To know that a continent is a group of countries.</p> <p>To know that they live in the</p>	<p>To be able to name the seven continents of the world. To be able to name the five oceans of the world.</p> <p>To know that a sea is a body of water that is smaller than an ocean.</p>	<p>To know where North and South America are on a world map.</p> <p>To know the names of some countries and major cities in Europe and North and South America.</p>	<p>To know the name of many countries and major cities in Europe and North and South America.</p>

		<p>continent of Europe.</p> <p>To know that an ocean is a large body of water.</p> <p>To know the name of two of the world's oceans (Atlantic Ocean and Pacific Ocean)</p> <p>To know that the UK is short for 'United Kingdom'.</p> <p>To know that a country is a land or nation with its own government.</p> <p>To know that the United Kingdom is made up of four countries and their names.</p> <p>To know the name of the country they live in.</p>	<p>To know that there are four bodies of water surrounding the UK and to be able to name them.</p> <p>To name some characteristics of the four capital cities of the UK. To know the four capital cities of the UK.</p> <p>To know that a capital city is the city where a country's government is located.</p>	<p>To know the names of some of the world's most significant mountain ranges. To know the names of some of the world's most significant rivers.</p> <p>To know that mountains, volcanoes and earthquakes largely occur at plate boundaries.</p> <p>To know that climate zones are areas of the world with similar climates.</p> <p>To know the world's different climate zones (equatorial, tropical, hot desert, temperate and polar).</p> <p>To know that biomes are areas of world with similar climates, vegetation and animals.</p> <p>To know the world's biomes.</p> <p>To know vegetation belts are areas of the world which are home to similar plant species.</p> <p>To know the name of some counties in the UK (local to your school). To know the name of some cities in the UK (local to your school).</p> <p>To know the name of the county that they live in and their closest city. To begin to name the twelve geographical regions of the UK.</p> <p>To know the main types of land use. To know some types of settlement.</p>	<p>To know the location of key physical features in countries studied.</p> <p>To name and describe some of the world's vegetation belts (ice cape, tundra, coniferous forest, deciduous forest, evergreen forest, mixed forest, temperate grassland, tropical grassland, Mediterranean, desert scrub, desert, highland).</p> <p>To know the name of many counties in the UK.</p> <p>To know the name of many cities in the UK.</p> <p>To confidently name the twelve geographical regions of the UK.</p> <p>To know that London and the Southeast regions have the largest population in the UK.</p> <p>To know the Prime/Greenwich Meridian is a line of longitude which goes through 0° and determines the start of the world's time zones.</p>

				<p>To know that countries near the Equator have less seasonal change than those near the poles.</p> <p>To know that the Equator is a line of latitude indicating the hottest places on Earth and splitting our globe into the Northern and Southern Hemispheres.</p> <p>To know lines of longitude are invisible lines on the globe that determine how far east or west a location is from the Prime Meridian.</p> <p>To know lines of latitude are invisible lines on the globe that determine how far north or south a location is from the Equator.</p> <p>To know the Tropics of Cancer and Capricorn are lines of latitude and mark the equatorial region; the countries with the hottest climates.</p> <p>To know the Northern and Southern hemisphere are 'halves' of the Earth, above and below our Equator and have alternate seasons to each other.</p> <p>To know the boundaries of the polar regions are marked by the invisible lines the Arctic and Antarctic circle.</p> <p>To know the patterns of daylight in the Arctic and Antarctic circle and the Equatorial regions.</p>	
--	--	--	--	--	--

**Place Knowledge**

	Reception	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
<b>Skills</b>		<p>Naming some key similarities between their local area and a small area of a contrasting non-European country.</p> <p>Naming some key differences between their local area and a small area of a contrasting non-European country.</p>	<p>Describing and beginning to explain some key similarities between their local area and a small area of a contrasting non-European country.</p> <p>Describing and beginning to explain some key differences between their local area and a small area of a contrasting non-European country.</p> <p>Describing what physical features may occur in a hot place in comparison to a cold place.</p>	<p>Describing and beginning to explain similarities between two regions studied. Describing and beginning to explain differences between two regions studied.</p> <p>Describing how and why humans have responded in different ways to their local environments.</p> <p>Discussing how climates have an impact on trade, land use and settlement.</p> <p>Explaining what measures humans have taken to adapt to survive in cold places.</p> <p>Describing and explaining how people who live in a contrasting physical area may have different lives to people in the UK.</p>	<p>Describing and explaining similarities between two environmental regions studied.</p> <p>Describing and explaining differences between two environmental regions studied.</p> <p>Explaining how and why humans have responded in different ways to their local environments in two contrasting regions.</p> <p>Understanding how climates impact on trade, land use and settlement. Explaining how humans have used desert environments.</p> <p>Using maps to explore wider global trading routes.</p>		
<b>Knowledge</b>		<p>To know that life elsewhere in the world is often different to ours.</p> <p>To know that life elsewhere in the world often has similarities to ours.</p>	<p>To know some similarities and differences between their local area and a contrasting non-European country.</p>	<p>To know the negative effects of living near a volcano.</p> <p>To know the positive effects of living near a volcano.</p> <p>To know the negative effects an earthquake can have on a community. To know ways in which communities respond to earthquakes.</p>	<p>To know some similarities and differences between the UK and a European mountain region.</p> <p>To know why tourists visit mountain regions.</p>		

**Human and physical geography**

	Reception	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
<b>Skills</b>		<p>Describing how the weather changes with each season in the UK.</p> <p>Describing the daily weather patterns in their locality.</p> <p>Confidently using the vocabulary 'season' and 'weather'.</p> <p>Recognising some physical features in their locality.</p> <p>Recognising some human features in their locality.</p>	<p>Locating some hot and cold areas of the world on a world map. Locating the Equator and North and South Poles on a world map.</p> <p>Locating hot and cold areas of the world in relation to the Equator and the North and South poles.</p> <p>Describing the key physical features of a coast using subject specific vocabulary.</p> <p>Describing and understanding the differences between a city, town and village. Describing the key human features of a coastal town using subject specific vocabulary.</p>	<p>Mapping and labelling the seven biomes on a world map. Understanding some of the causes of climate change.</p> <p>Describing how physical features, such as mountains and rivers are formed, and why volcanoes and earthquakes occur.</p> <p>Describing where volcanoes, earthquakes and mountains are located globally.</p> <p>Describing and explaining how physical features such as rivers, mountains, volcanoes and earthquakes have had an impact upon the surrounding landscape and communities.</p> <p>Describing how humans use water in a variety of ways.</p> <p>Describing and understanding types of settlement and land use. Explaining why a settlement and community has grown in a particular location. Explaining why different locations have different human features. Explaining why people might prefer to live in an urban or rural place.</p> <p>Describing how humans can impact the environment both positively and negatively, using examples.</p>			<p>Describing and understanding the key aspects of the six biomes.</p> <p>Describing and understanding the key aspects of the six climate zones.</p> <p>Understanding some of the impacts and causes of climate change.</p> <p>Describing and understanding the key aspects and distribution of the vegetation belts in relation to the six biomes, climate and weather.</p> <p>Giving examples of alternative viewpoints and solutions regarding an environmental issue and explaining its links to climate change.</p> <p>Describing and understanding economic activity including trade links.</p> <p>Suggesting reasons why the global population has grown significantly in the last 70 years.</p> <p>Describing the 'push' and 'pull' factors that people may consider when migrating.</p>

					<p>Understanding the distribution of natural resources both globally and within a specific region or country studied.</p> <p>Recognising geographical issues affecting people in different places and environments.</p> <p>Describing and explaining how humans can impact the environment both positively and negatively, using examples.</p>
<p><b>Knowledge</b></p>		<p>To know the four seasons of the UK.</p> <p>To know that 'weather' refers to the conditions outside at a particular time.</p> <p>To know that different parts of the UK often experience different weather.</p> <p>To know that a weather forecast is when someone tries to predict what the weather will be like in the near future.</p> <p>To know that weather conditions can be measured and recorded.</p> <p>To know that physical features means any feature of an area that is on the Earth naturally.</p> <p>To know that human features means any feature of an area that was made or built by humans.</p>	<p>To know that the Equator is an imaginary line around the middle of the Earth.</p> <p>To know that, because it is the widest part of the Earth, the Equator is much closer to the sun than the North and South poles.</p> <p>To know that the North Pole is the northernmost point of the Earth, and the South Pole is the southernmost point of the Earth.</p> <p>To know that different parts of the world experience different weather conditions and that these are often caused by the location of the place.</p> <p>To know that coasts (and other physical features) change over time. To know</p>	<p>To know that the water cycle is the processes and stores which move water around our Earth and to be able to name these.</p> <p>To know the courses and key features of a river.</p> <p>To know the different types of mountains and volcanoes and how they are formed.</p> <p>To know that an earthquake is the intense shaking of the ground.</p> <p>To know that a biome is a region of the globe sharing a similar climate, landscape, vegetation and wildlife. To know the world's biomes.</p> <p>To know that the hottest biomes are found between the Tropics of Cancer and Capricorn.</p> <p>To know that climate zones are areas of the world with similar climates. To know the world's different climate zones.*</p> <p>To know that climates can influence the foods able to grow.</p> <p>To know the main types of land use.</p>	<p>To know vegetation belts are areas of the world that are home to similar plant species.</p> <p>To name and describe some of the world's vegetation belts. To know why the ocean is important.</p> <p>To know the global population has grown significantly since the 1950s.</p> <p>To know which factors are considered before people build settlements.</p> <p>To know migration is the movement of people from one country to another.</p> <p>To know that natural resources can be used to make energy.</p> <p>To know some positive impacts of humans on the environment. To know some negative impacts of humans on the environment.</p>

			<p>some key physical features of the UK.</p> <p>To know that a sea is a body of water that is smaller than an ocean. To know that human features change over time.</p> <p>To know some key human features of the UK.</p>	<p>To know the different types of settlement.</p> <p>To know water is used by humans in a variety of ways.</p> <p>To know an urban place is somewhere near a town or city.</p> <p>To know a rural place is somewhere near the countryside.</p> <p>To know that a natural resource is something that people can use which comes from the natural environment.</p> <p>To know the threats to the rainforest both on a local and global scale.</p> <p>To know that fair trading is the process of ensuring workers are paid a fair price, have safe working conditions and are treated with respect and equality.</p> <p>To know the UK grows food locally and imports food from other countries.</p>	
--	--	--	--	--	--

## Geographical Fieldwork

	Reception	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
<b>Question</b>		Ask questions about the world around them.	Recognising there are different ways to answer a question.	Beginning to choose the best approach to answer an enquiry question.		Developing their own enquiry questions. Choosing the best approach to answering an enquiry question.	
<b>Observe</b>		Commenting on the features they see in their school and school grounds on a walk around the respective places.	Discussing the features, they see in the area surrounding their school when on a walk.  Asking and answering simple questions about human and physical features of the area surrounding their school grounds.	Mapping land use in a small local area using maps and plans.  Making a plan for how they wish to collect data to answer an enquiry-based question, with the support of a teacher.  Asking and answering one- step and two-step geographical questions.  Observing, recording, and naming geographical features in their local environments.		Making sketch maps of areas studied including labels and keys where necessary.  Making an independent or collaborative plan of how they wish to collect data to answer an enquiry-based question.	
<b>Measure</b>		Asking and answering simple questions about the features of their school and school grounds.	Collecting quantitative data through a small survey of the local area/school to answer an enquiry question.	Using simple sampling techniques appropriately. Making digital audio recordings for a specific purpose.  Designing a questionnaire /interview to collect quantitative fieldwork data.		Selecting appropriate methods for data collection.  Designing interviews/questionnaires to collect qualitative data.  Beginning to use standard field sampling techniques appropriately.	
<b>Record</b>		Drawing some of the features they notice in their school and school grounds in correct relation to each other on a sketch map.	Classifying the features they notice into human and physical with teacher support.  Taking digital photographs of geographical features in the locality. Making digital audio	Taking digital photos and labeling or captioning them.  Making annotated sketches, field drawings and freehand maps to record observations during fieldwork.  Begin to use a simplified Likert Scale to record their judgements of environmental quality.		Using GIS (Geographical Information Systems) to plot data sets (e.g prevalence of crime in certain areas) onto base maps which can then be analysed.  Using a simplified Likert Scale to record their judgements of environmental quality.	

			recordings when interviewing someone.	Using a questionnaire/interview to collect qualitative fieldwork data.	Conducting interviews/questionnaires to collect qualitative data. Interpreting and using real-time/live data.  To identify and mitigate potential risks during fieldwork.
<b>Present</b>		Using a simple recording technique to express their feelings about a specific place and explaining why they like/dislike some of its features.	Presenting data in simple tally charts or pictograms and commenting on what the data shows.  Asking and answering simple questions about data.	Presenting data using plans, freehand sketch maps, annotated drawings, graphs, presentations, writing and digital technologies when communicating geographical information.  Suggesting different ways that a locality could be changed and improved. Finding answers to geographical questions through data collection. Analysing and presenting quantitative data in charts and graphs.	Deciding how to present data using plans, freehand sketch maps, annotated drawings, graphs, presentations, writing at length and digital technologies when communicating geographical information.  Drawing conclusions about an enquiry using findings from fieldwork to support your reasonings.  Evaluating evidence collected and suggesting ways to improve this.  Analysing quantitative data in pie charts, line graphs and graphs with two variables.

**Geographical skills and fieldwork**

	Reception	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
<b>Skills</b>		Using an atlas to locate the UK.	Recognising why maps need a title.	Beginning to use maps at more than one scale.		Confidently using and understanding maps at more than one scale.	
		Using a map of the UK to locate the four countries.	Using an atlas to locate the four capital cities of the UK.	Using atlases, maps, globes, satellite images and beginning to use digital mapping to locate countries studied.		Using atlases, maps, globes and digital mapping to locate countries studied.	
		Beginning to use an atlas to locate the four capital cities of the UK.	Using a world map, globe and atlas to locate all the world's seven continents.	Using atlases, maps, globes and beginning to use digital mapping to recognise and describe physical features and human features in countries studied.		Using atlases, maps, globes and digital mapping to describe and explain physical and human features in countries studied.	
		Using a world map and globe to locate two of the world's seven continents (Europe and Asia)	Using a world map, globe and atlas to locate the world's five oceans.	Using the scale bar on a map to estimate distances.		Identifying, analysing and asking questions about distributions and relationships between features using maps (e.g settlement distribution).	
		Using an atlas to locate the Atlantic Ocean and Pacific Ocean.	Using locational language and the compass points (N, S, E, W) to describe the location of features on a map.	Finding countries and features of countries in an atlas using contents and index.		Using the scale bar on a map to calculate distances.	
		Using directional language to describe the location of objects in the classroom and playground.	Using locational language and the compass points (N, S, E, W) to describe the route on a map.	Zooming in and out of a digital map.		Recognising an increasing range of Ordnance Survey symbols on maps and locating features using six-figure grid references.	
		Using directional language to describe features on a map in relation to other features (real or imaginary).	Using locational language and the compass points (N, S, E, W) to plan a route in the playground or school grounds.	Beginning to use the key on an OS map to name and recognise key physical and human features in regions studied.		Recognising the difference between Ordnance Survey and other maps and when it is most appropriate to use each.	
			Using locational language and the compass points (N, S, E, W) to plan a route in the playground or school grounds.	Accurately using 4-figure grid references to locate features on a map in regions studied.			

		<p>Responding to instructions using directional language to follow routes.</p> <p>Beginning to use the compass points (N, S, E, W) to describe the location of features on a map.</p> <p>Recognising local landmarks on aerial photographs.</p> <p>Recognising basic human features on aerial photographs.</p> <p>Recognising basic physical features on aerial photographs.</p> <p>Drawing freehand maps (of real or imaginary places) using simple pictures or symbols.</p> <p>Drawing a simple sketch map of the classroom and playground using simple pictures, colours or symbols to represent features.</p> <p>Adding labels to sketch maps. Using simple picture maps and plans to move around the school.</p>	<p>Using a map to follow a prepared route.</p> <p>Recognising landmarks of a city studied on aerial photographs and plan perspectives.</p> <p>Recognising human features on aerial photographs and plan perspectives.</p> <p>Recognising physical features on aerial photographs and plan perspectives.</p> <p>Drawing a map and using class agreed symbols to make a simple key.</p> <p>Drawing a simple sketch map of the playground or school grounds using symbols to represent human and physical features.</p> <p>Finding a given OS symbol on a map with support.</p> <p>Beginning to draw objects to scale (e.g show the school playground is smaller than the school or school field).</p> <p>Using an aerial photograph to draw a simple sketch map using basic symbols for a key.</p>	<p>Beginning to locate features using the 8 points of a compass.</p> <p>Using a simple key on their own map to show an example of both physical and human features.</p> <p>Following a route on a map with some accuracy. Saying which directions are N, S, E, W, on an OS map. Making and using a simple route on a map.</p> <p>Labelling some features on an aerial photograph and then locating these on an OS map of the same locality and scale in regions studied.</p>	<p>Beginning to use thematic maps to recognise and describe human and physical features studied.</p> <p>Using models and maps to talk about contours and slopes. Selecting a map for a specific purpose.</p> <p>Confidently using the key on an OS map to name and recognise key physical and human features in regions studied.</p> <p>Accurately using 4 and 6-figure Grid References to locate features on a map in regions studied.</p> <p>Confidently locating features using the 8 points of a compass. Following a short pre-prepared route on an OS map. Identifying the 8 compass points on an OS map.</p> <p>Planning a journey to another part of the world using six figure grid references and the eight points of a compass.</p>
<p><b>Knowledge</b></p>		<p>To know that an aerial photograph is a photograph taken from the air above.</p> <p>To know that atlases give information about the world and that a map tells us information about a place.</p>	<p>To know that a globe is a spherical model of the Earth.</p> <p>To begin to recognise world maps as a flattened globe.</p> <p>To know that a compass is an</p>	<p>To understand that a scale shows how much smaller a map is compared to real life. To recognise world maps as a flattened globe.</p> <p>To know that an OS (Ordnance survey) map is used for personal use and organisations use it for housing projects, planning the natural environment and</p>	<p>To know that contours on a map show height and slope.</p> <p>To know that qualitative data involves qualities, characteristics and is largely opinion based and subjective.</p>

		<p>To know that a map is a picture of a place, usually drawn from above.</p> <p>To know that symbols are often used on maps to represent features.</p> <p>To know simple directional language (e.g near, far, up, down, left, right, forwards, backwards).</p> <p>To know what a sketch map is.</p>	<p>instrument we can use to find which direction is north.</p> <p>To know which direction is N, S, E, W, on a map.</p> <p>To know that maps need a title and purpose.</p> <p>To know that maps need a key to explain what the symbols and colours represent.</p> <p>To know that an interview can be a way to find out people's views about their area.</p> <p>To know that a tally chart is a way of collecting data quickly.</p> <p>To know that a pictogram is a chart that uses pictures to show data.</p>	<p>public transport and for security purposes.</p> <p>To know that an OS map shows human and physical features as symbols. To know that grid-references help us locate a particular square on a map.</p> <p>To know the eight points of a compass are north, south, east, west, north-east, south-east, north-west, south-west.</p> <p>To know the main types of land use (agricultural, residential, recreational, commercial, industrial and transportation)</p> <p>To know an enquiry-based question has an open-ended answer found by research.</p> <p>To know how to use various simple sampling techniques.</p> <p>To know what a questionnaire and an interview are.</p> <p>To know that quantitative data involves numerical facts and figures and is often objective.</p> <p>To know that an annotated drawing or sketch map is hand drawn and gives a rough idea of features of an area without having to be completely accurate.</p> <p>To know a Likert scale is used to record people's feelings and attitudes.</p> <p>To know that quantitative data involves numerical facts and figures and is often objective.</p>	<p>To know that GIS is a digital system that creates and manages maps, used to support analysis for enquiries.</p> <p>To know that a pie chart can represent a fraction or percentage of a whole set of data.</p> <p>To know a line graph can represent variables over time.</p> <p>To be aware of some issues in the local area.</p> <p>To know what a range of data collection methods look like.</p> <p>To know how to use a range of data collection methods.</p>
